

YARL GEEK CHALLENGE

Senior - Season 06

Smart Gard

TEAM – UNIQUE PARTNERS

Sabaragamuwa University of SriLanka
Smart Gard

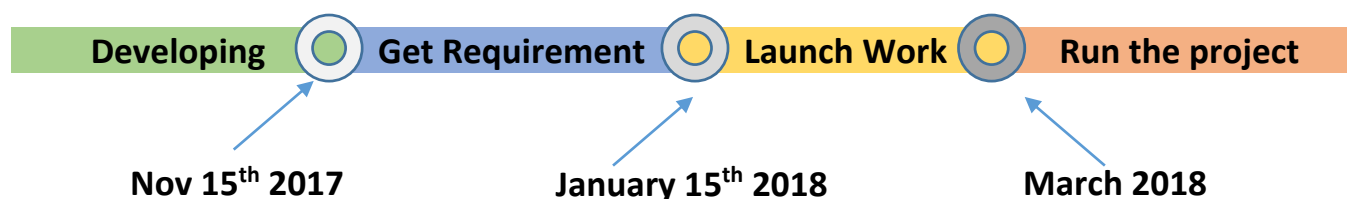

Thank you for your reviews. We all realize your review and come to the point, which you expect from us. Actually, we don't mention the actual amount of requirements. Let's we are committed to doing these suggestions.

- ❖ Our product target applies **not only to Professional farmers but also to Gardeners who work with busy life.**(Both husband and wife are in jobs)
- ❖ Busy Lankans mean - nowadays most of the families are both husband and wife are in jobs.They **can't maintain a home garden because of the time problem and don't know the actual maintenance.**Our product solves their problems.

1. The budget planning

Requirements	Cost we estimate	Period of visibility
		Start develop Nov 15th, 2017
• Hardware things	10,000/= (Long use)	
• For Team (working)	50,000/=	
• Extra cost (electricity...etc.)	3,000/=	
• Garden maintaining	2,000/=	
		Launch January 15th, 2018
	Total=65,0000/=	Get Investment March 15th, 2018
		Profit starts 16 th of March 2018

- Through this estimate, we are going to work with our team.
- We have a problem with collect the investment.
- But we ensure users must have an advantage from us.

2. How deep we sure, Users buy our product

- We can make products wide level as a company and then market our products to our customers
- Can use social media to market our products through video demos, images, and our protocol sample.
- Connect with agrarian service centres to easily market with people.
- We can maintain a sample greenhouse garden in our home to reach customers to our products output.
- Use some marketing companies through island-wide to introduce our product to the people who need this product.
- We can make a web page to market and make orders online.

3. Similar products...!

- We knew automatic Watering system for garden.(already have)

4. Not only android....!

- Just we mention Smartphones. In SriLanka, **Android** users are more than **IOS/Windows** users.
- Otherwise, we also mention all smartphone users.

5. We using mobile app technology & Arduino to do our system.

6. Product Status....!

- Unfortunately, we don't have a Working product now. System is developing process.....But we can finish it.
- We **pass the requirement test**.And now we are developing the system.

❖ Few years later we will do a startup for our product. Our team **be sure to ready for fight** in YGC-Senior Season 06 Which is held on November 3rd 4th 5th.
